Subject: East Harbor Hills LLC

To whom it may concern,

I oppose manufactured home zoning text amendment to add mobile/manufactured homes as a permitted use under residential PUD standards.

Approving this proposal would do irreparable and irreversible damage to the environment, wild life and water shed underneath it. If we cared about the environment, as we all like to claim that we do, we would not allow any high density development that will undeniably destroy our most important natural resources.

As for manufacture homes on rented land, all has been said by many who spoke on prior public hearings. It's not to the benefit of future Blaine citizens.

Hope your decision will be guided by common sense of Blaine citizens that truly care for the future of its city and not profit driven investors and developers.

Sincerely,

Marija Boothe
