

Fall Planting

"The Right Time to Landscape"

HIGH PERFORMANCE!

Fall is the most active planting period because of the desirable cooler air and warm soil temperatures for plants.

FREE WATER!

Fall rains keep your plants watered and healthy.

EARLY BIRD GETS THE WORM!

Planting trees, shrubs and perennials in the fall gives them a good start and chance to establish healthy roots before summer.

BARGAINS!

Many tree, shrub and perennial species are on sale during the fall at your local garden nursery.
